MESSAGE

The United Nations' First International Day of Clean Air for blue skies will be observed on 7th September, 2020. The Ministry of Environment, Forest and Climate Change, Government of India fully supports this initiative of United Nations. The air quality concerns are universal and the Government of India has taken a firm step in this direction. Guided by the vision of the Hon'ble Prime Minister, the National Clean Air Programme (NCAP), which was launched in 2019, will be taken up on a mission mode and the United Nations International Day of Clean Air for Blue Skies on 7th September, 2020 is the most appropriate moment for the same. The NATIONAL MISSION for CLEAN AIR (NMAC) is modeled on a motto "Clean air for all", to be taken up with collaborative and collective participation of individuals, communities, civil society, academia (knowledge partners), Central Ministries/State Government Departments, ranging from policies, standards etc. to the field actions at the grassroot levels. The collaborative mission targets 122 identified cities with individual city action plans.

On the occasion of this International Day of Clean Air, we are happy to note the commitment made by several organizations to curb air pollution and they have our full support in facilitating the actions and resolve to improve air quality and building capacity in the country.

Date: 03.09.2020

South Asian Cities Support First International Day of Clean Air for Blue Skies

The United Nations' first International Day of Clean Air for blue skies will be observed on September 7, 2020, to stress the urgent need to raise public awareness and to promote and facilitate actions to improve air quality.

The lockdowns over the pandemic crisis have brought the world an unintended benefit of cleaner air and blue skies. But these improvements will be temporary unless we use this opportunity to take concrete action, collectively, to ensure lasting changes.

As mayors and city administrators of our cities, we need to step up, become change makers and act now to protect our citizens from the devastating consequences of air pollution. As members of the ICLEI South Asia network, we fully endorse the United Nations' International Day of Clean Air for blue skies and commit to use our authority and influence to reduce air pollution in our cities to meet the Sustainable Development Goal of making cities inclusive, safe, resilient and sustainable.

We welcome the first 'International Day of Clean Air for blue skies' and acknowledge the need for enhanced stakeholder engagement at all levels, and to promote and facilitate actions to improve air quality.

We acknowledge the transboundary impact of air pollution and will form strong partnerships with local, regional and national authorities, as well as with the private sector and academic institutions to find best practices and to coordinate action to mitigate air pollution.

We will promote actions to improve air quality such as use of low emission public transport and walking/ cycling; incentives to reduce traffic congestion and industrial emissions; expansion of access to clean energy for cooking and heating; increase in green cover; air quality monitoring and reduction in improper disposal of waste.

Breathing clean air is a fundamental human right. We reaffirm our commitment to improving air quality for the purposes of mitigating climate change impact, fostering a better environment and reducing negative impacts on human health.

Nagpur Municipal Corporation would like to appreciate and support the initiative taken by United Nations' to observe and celebrate International Day of 'Clean Air for blue skies' on September 7, 2020, to stress the urgent need to raise public awareness and to promote and facilitate actions to improve air quality.

The lockdowns over the pandemic crisis have brought the world an unintended benefit of cleaner air and blue skies. But these improvements will be temporary unless we use this opportunity to take concrete action, collectively, to ensure lasting changes.

As mayors and city administrators of our cities, we need to step up, become change makers and act now to protect our citizens from the devastating consequences of air pollution. As members of the ICLEI South Asia network, we fully endorse the United Nations' International Day of Clean Air for blue skies and commit to use our authority and influence to reduce air pollution in our cities to meet the Sustainable Development Goal of making cities inclusive, safe, resilient and sustainable.

We welcome the first 'International Day of Clean Air for blue skies' and acknowledge the need for enhanced stakeholder engagement at all levels, and to promote and facilitate actions to improve air quality.

We acknowledge the transboundary impact of air pollution and will form strong partnerships with local, regional and national authorities, as well as with the private sector and academic institutions to find best practices and to coordinate action to mitigate air pollution.

We will promote actions to improve air quality such as use of low emission public transport and walking/ cycling; incentives to reduce traffic congestion and industrial emissions; expansion of access to clean energy for cooking and heating; increase in green cover; air quality monitoring and reduction in improper disposal of waste.

Nagpur city has taken several initiatives such as preparing low emission development strategies & climate action planning, adaptive traffic management systems, establishing air quality sensors with central remote monitoring for regular air quality analysis, establishing safe & dedicated cycle tracks to promote non-motorized transport system, local biodiversity strategy & action planning, increasing city's green cover undertaking tree plantation etc.

Breathing clean air is a fundamental human right. We reaffirm our commitment to improving air quality for the purposes of mitigating climate change impact, fostering a better environment and reducing negative impacts on human health.

South Asian Cities Support First International Day of Clean Air for Blue Skies

The United Nations' first International Day of Clean Air for blue skies will be observed on September 7, 2020, to stress the urgent need to raise public awareness and to promote and facilitate actions to improve air quality.

The lockdowns over the pandemic crisis have brought the world an unintended benefit of cleaner air and blue skies. But these improvements will be temporary unless we use this opportunity to take concrete action, collectively, to ensure lasting changes.

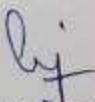

As mayors and city administrators of our cities, we need to step up, become change makers and act now to protect our citizens from the devastating consequences of air pollution. As members of the ICLEI South Asia network, we fully endorse the United Nations' International Day of Clean Air for blue skies and commit to use our authority and influence to reduce air pollution in our cities to meet the Sustainable Development Goal of making cities inclusive, safe, resilient and sustainable.

We welcome the first 'International Day of Clean Air for blue skies' and acknowledge the need for enhanced stakeholder engagement at all levels, and to promote and facilitate actions to improve air quality.

We acknowledge the transboundary impact of air pollution and will form strong partnerships with local, regional and national authorities, as well as with the private sector and academic institutions to find best practices and to coordinate action to mitigate air pollution.

We will promote actions to improve air quality such as use of low emission public transport and walking/ cycling; incentives to reduce traffic congestion and industrial emissions; expansion of access to clean energy for cooking and heating; increase in green cover; air quality monitoring and reduction in improper disposal of waste.

Breathing clean air is a fundamental human right. We reaffirm our commitment to improving air quality for the purposes of mitigating climate change impact, fostering a better environment and reducing negative impacts on human health.

Following is the list of actions, policies and plans Udaipur Municipal Corporation (UMC) is taking under various projects to improve air quality of the city:

Sr. No.	Ongoing Projects
1	Installation of 4 Ambient Air Quality Sensors for continuous monitoring of air quality, CapaCTHES project
2	80 Kw capacity roof top Solar PV at UMC office building
3	Daily cleaning of main roads of the city through suction machines to reduce dust and PM
4	Implementation of Public Bicycling Sharing to improve NMT in the city, Smart City Mission
5	30 TPD Material Recovery Facility for Dry Waste Management, UMC and Smart City Mission
6	60 TPD Compost Plant for Wet Waste Management, Smart City Mission
7	45 (25+20) MLD STP, Smart City Mission
8	Capping of old garbage dumping site
9	Implementation of city-wide Underground Sewerage Network, AMRUT and Smart City Mission
10	2 TPD Bio Methanation Plant (Wet waste to Energy), CapaCTHES project
11	Implementation of 18 E-Rickshaw in the city to boost up E-mobility in the city, CapaCTHES project
12	Implementation of water fountains at main intersections
	Proposed Projects
1	City wide cycling track planning to improve NMT in the city, Smart City Mission
2	Phase 2 of Public Bicycling Sharing, Smart City Mission
3	Captive Solar Power Plant of 2 Mw capacity, Smart City Mission
4	Sanitary landfill, Smart City Mission
5	20 TPD Biomethanation plant (Wet waste to Bio CNG), Smart City Mission
6	50 TPD Construction and Demolition waste processing plant, Smart City Mission
7	Material Recovery Facility for Dry Waste Management, Smart City Mission
8	Animal Carcass Management Plant, Smart City Mission
9	Green Mobility Zone proposal for walled city area to reduce air pollution, GHG emission and traffic congestion in the core city, CapaCTHES
10	Ayad River redevelopment, Smart City Mission
11	Improvement of main intersections of the city for improvement in traffic movement, Smart City Mission
12	Target of 4000 tree plantation in the city, UMC
	Policy Level
1	National Clean Air Action Plan for the city
2	City wide ban on 15 year old commercial diesel vehicles
3	Climate Resilient City Action Plan (CRCAP) for City, CapaCTHES
4	Low Carbon IPT Action Plan, CapaCTHES
5	Low-carbon Comprehensive Mobility Plan for Udaipur (LCMP)
6	Udaipur Solar City Master Plan, UNEP
7	City Sanitation Plan, Udaipur

Udaipur is renowned for its green and blue Vistas and famous as "Lake city of India and Venice of the East in the world". In today's circumstances, toxic air pollution has become a global crisis, and as Mayor, it is our fundamental responsibility to protect the public from this invisible killer. That's why, in Udaipur we took various measures to mitigate air pollution.
